

**Mr. YERASSYL KHAMIT**

**Patient Details**

DOB: 22.10.2008  
Age: 13 year  
Gender: Male  
MRN: AHLDMC0342387

**Account**

AMINA HOSPITAL LLC

Al Quds Street, Ajman, United Arab Emirates

Ajman

Accession:

03-22-233-02820

Requesting Physician:

Reference Number:

Passport: N11736888

Date Coll: 07/Aug/2022 17:45

Date Rec: 07/Aug/2022 17:45

Date Verified: 07/Aug/2022 18:23

**Molecular**

**Orderable**

SARS CoV 2, NAA (9917137)

**Specimen Type**

Nasopharyngeal Swab

<b>Test</b>	<b>Result</b>	<b>Units</b>	<b>Reference Range</b>
SARS CoV 2	NOT DETECTED <sup>f1</sup>		

f: "Not Detected" (Negative) result indicates that SARS CoV 2 RNA is not present in patient's specimen. However, this result may be influenced by the stage of the infection, quality and type of the specimen collected for testing. Result should be correlated with patient's history and clinical presentation.  
SARS CoV 2 (COVID-19) by nucleic acid amplification test is based on reverse transcriptase PCR (RT-PCR) and targets at least two distinct regions in SARS COV 2 genome (ORF1 , RdRP and N gene).  
This test is accredited by EIAC ISO 15189.
